NEW FLOWER CREATIONS

CELOSIA "Gilbert's Maple Gold"

This new variety is the loveliest of all cristata—coxcomb—creations and is the result of 18 years of line breeding. The maple-pink heads vary in color from light to dark pink, tipped with pure gold. These clusters may be cut at any stage and size and used in any arrangement from corsages to funeral sprays as the heads will last 3 or 4 days out of water. The individual plants, which are of the strong branching type, grow 2-3 feet high.

MARIGOLD "Flash" (Silver Medal A.A.S. 1945)

The most striking French marigold to date. Plants, uniform and compact in habit of growth, develop into bushy colorful mounds averaging 18 in. in height. The single flowers measure 1¾ in. and more across. A combination of colors—ranging from vivid red through bronze with a few yellow flowers on the same plant, giving a rich and bizarre effect. An early and continuous bloomer throughout the season. Very useful for border and bedding use, and as a cut-flower for low flower arrangements.

MARIGOLD "Real Gold" (Bronze Medal A.A.S. 1945)

Largest of all Carnation-Marigolds, with giant exhibition blooms 4 in. and more across, of a golden-orange color, fully double, deeper, larger and richer than Guinea Gold strains. A strong erect grower reaches 30 in. in height and is an early to late bloomer, as reported from south to north.

MARIGOLD "Mammoth Mum"

A large incurved chrysanthemum-flowered Marigold and a close rival to the big Japanese Chrysanthemum. Bushy, strong, erect plants reach 3 ft. by August, when long-stemmed flowers appear to amaze one with huge blooms, 4-5 in. across and 2 in. deep; color is rich lemon-yellow. Flowering from August until freezing weather, it makes a colorful show in the garden and gives long-lasting cut flowers. (*Honorable Mention A.A.S. 1944*).

PRIMULA OBCONICA "Wyaston Wonder"

This famous English variety is undoubtedly the most outstanding Primula produced in recent years. Enormous trusses of stiff-stemmed bright crimson flowers; the individual florets average 2½-in. across. This Primula is strictly in a class by itself and sells on sight, it has no rival in the size of its flowers, its perfection of form and vigor of growth.

SUPER GIANT ZINNIAS

The largest of all Zinnias, with the loveliest colors and combinations of colors ever seen in this flower. Rare and unusual shades of cream, buff, apricot, salmon, rose and orange predominate, with a few yellows and whites; scarlet and crimson are not prominent, though there are some very attractive flowers in these colors. One is impressed at the many two-tone and three-tone color effects seen in some of the blooms.

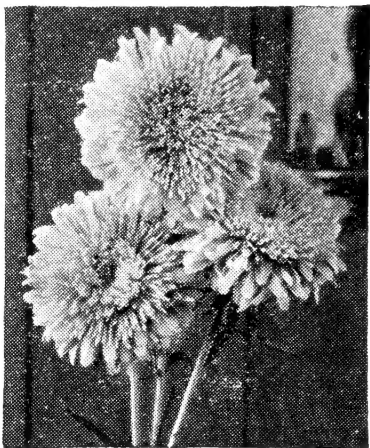

Flowers are truly giant, 5½ to 6½ in. across, and of a wide diversity of flower form — some like Dahlia Flowered, others like Giants of California, and still, others with curled and twisted chrysanthemum-like flower heads.
